

Barker as Editor-in-Chief. The journal will cover all aspects of the theory of matrices and finite-dimensional linear algebra, as well as significant applications to other branches of mathematics, and will function as a complement to *Linear Algebra and Its Applications* by publishing survey and expository articles. Historical papers of interest to its readership are also welcomed. Inquiries regarding such papers should be sent to Associate Editor Thomas Hawkins, Department of Mathematics, Boston University, Boston, MA 02215 U.S.A.

#### AFIPS AND CBI: A COMPUTER HISTORY PROGRAM

The American Federation of Information Processing Societies, Inc. (AFIPS) and The Charles Babbage Institute for the History of Information Processing (CBI) have signed an agreement under which they will join forces to carry out a program in the history of information processing. AFIPS will be a major financial sponsor and active participant in the affairs of CBI, a nonprofit corporation. The purpose of CBI is to engage in and encourage activities concerning the history of computers and computation and to foster programs in the history of information processing. The activities of CBI will take place in a "Center for the History of Information Processing" to be located at a major university with graduate programs in information processing and in the history of science and technology. A Search Committee for a host institution has begun work. The program will involve the taking of oral histories, establishment of archives, occasional publications, etc. Fellowships and internships will be available. For further information, contact: at AFIPS, Ms. Marjorie Greimel, Coordinator of Communications, (201) 391-9810; at CBI, Mr. Paul Armer, Executive Secretary, (415) 328-0984.
